

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Reporting Requirements Not Met for City of Eureka, KS

Our water system recently incurred violations of drinking water regulations. We are required to monitor your drinking water for specific contaminants on a regular basis, and to submit reports to the Kansas Department of Health and Environment (KDHE) by specific due dates. Our June 2020 turbidity and disinfection report was due to KDHE on 7/10/2020. The report did not arrive to KDHE until 7/29/2020. The law requires us to distribute this public notice describing the violation even though this was not an emergency.

What should I do?

You do not need to use an alternative (e.g., bottled) water supply.

What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately.

What happened? What is being done?

[Describe corrective action.] Turbidity and disinfection report did not reach the KDHE office by the due date. The City of Eureka is now sending the reports electronically to ensure they are not late.

We anticipate resolving the problem within [estimated time frame] Our July 2020 report arrived to KDHE on 8/04/2020. We are now returned to a status of "in compliance" for submitting the reports. No further actions are required for this violation.

For more information, please contact Name: **Renee Burk** at Phone: 620-583-6511
Or by Mail: 309 N OAK, PO BOX 68, EUREKA, KS 67045-0068

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by City of Eureka, KS

Date distributed: May 28, 2021

Contents of Notice

All public notices must include a clear and readily understandable explanation of each violation or situation and must address the following ten (10) elements:

- 1) Description of the violation or situation including contaminant(s) of concern and (as applicable) the contaminant level(s);
- 2) When the violation or situation occurred;
- 3) Any potential adverse health effects from the violation or situation, using standard language provided in the Rule;
- 4) The population at risk, including subpopulations particularly vulnerable if exposed to the contaminant in their drinking water;
- 5) Whether alternate water supplies should be used;
- 6) What actions consumers should take, including when to seek medical help, if known;
- 7) What the system is doing to correct the violation or situation;
- 8) When the system expects to return to compliance or resolve the situation;
- 9) Contact information: name, business address, and phone number of the water system owner, operator, or designee of the PWS that can provide additional information; and
- 10) A statement encouraging notice recipients to distribute the notice to other persons served using standard language from the rule, where applicable.
